

COMING TO **Michael Schuman's** HYPNOSIS
OFFICE IN JULY

THE VIRTUAL GASTRIC BAND® PROGRAM

Developed in London, England by Sheila Granger, this program is the latest cutting edge program for weight loss and control.

This is accomplished by using only hypnosis! NO COSTLY INVASIVE SURGERY and NO CONSTANT READJUSTING.

It is most definitely NOT a diet!

Diets only work in the short term.

The Virtual Gastric Band® allows you to eat what you want, but will enable you to consume smaller portions. And, because it's not a diet, you won't feel deprived, miserable or hungry...the issues that cause diets to fail. As the **Virtual Gastric Band®** effectively negates these issues; you are provided with a long term solution to your weight problems.

Michael Schuman, B.C.S. is being trained and certified to use this procedure and will be accepting clients beginning in July who are serious about gaining control of their weight but don't want to pay thousands of dollars for the surgical procedure and the follow up adjusting.

Clients will be expected to agree to the full course of sessions in partnership with **Michael Schuman, B.C.S.** and payment will be expected for the full course at the first session. Complete information will be available beginning July 3rd by calling: 713-662-8511.
